

Every day, ask these 3 questions:

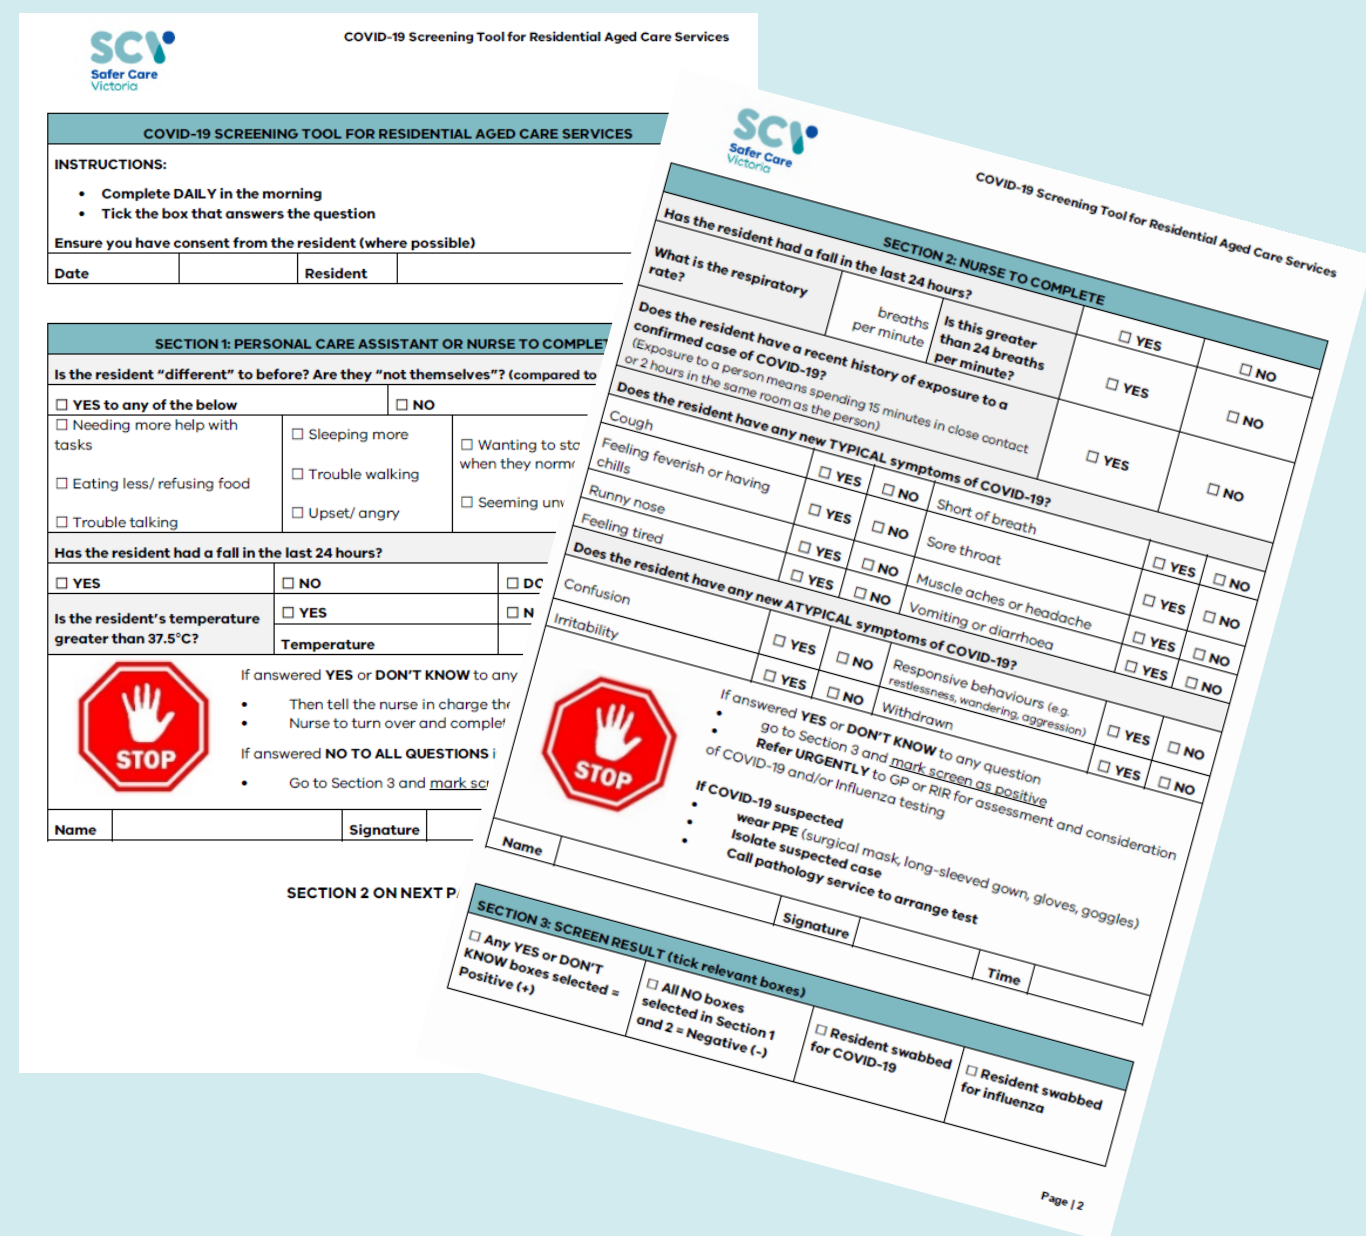

Is the resident different to before?

Has the resident had a fall in the last 24 hours?

Is the resident's temperature greater than 37.5°C?

The COVID-19 screening tool for residential aged care services was developed with clinical experts and tested by RACS.

The two page tool helps staff identify typical and atypical signs of COVID-19.

If the answer is YES to any of the questions:

Tell the nurse in charge

Escalate care to GP or Residential in Reach

Consider testing for COVID-19
