
Documents required by CCOPMM for: Child & Adolescent Death

Please provide the following documents (if applicable and available) within 28 days of death or as specified by CCOPMM:

Note: in most cases, provided they are adequately comprehensive, copies of pre-existing documents may meet CCOPMM's requirements. Please send a clinical summary by an experienced clinician to accompany this information if copies of acceptable pre-existing information cannot be sent.

- Internal health service review of death*
- Medical Certificate of Cause of Death
- Summary of medical disease/condition causing death and the circumstances of death
- Summary of underlying conditions (including mental health conditions) including diagnosis and complications, and contact details of treating health services providers
- If the condition was present at birth, a comprehensive summary of obstetric and neonatal details
- Relevant laboratory investigations including any genetic, metabolic or biopsy test results
- Post mortem examination*
- Details of any current or past involvement with Department of Health and Human Services (Child protection)

****While these documents are unlikely to be completed within 28 days, please upload to the SharePoint folder as soon as possible.***
